

LIBEROHELLENIC REGISTER

CLASSIFICATION & STATUTORY SERVICES

**Focus on safety.
Aim for compliance.**

What we do

Driven by our purpose for protecting life, property and the environment, we strive to improve safety, ensure compliance and enhance quality for each vessel in every stage, from design to construction, operation and resale.

With head office located in Piraeus, Greece and constant expansion and training of our network of surveyors, we aim to provide immediate and reliable services to every client who wishes to protect and enhance their vessel's safety.

Our services are offered in accordance with international maritime regulations, EU and national requirements of each flag administration.

Through our technical team, we conduct document review and surveys impartially, in order to address on time potential risks and advise you on the condition of your vessel. Once in service, each vessel undergoes periodical inspections to confirm continuous compliance and safety.

Our Services

- Classification services for both newbuilding and fleet in service
- Plan approval and technical review
- Newbuilding surveys and supervision
- Condition and evaluation surveys
- Statutory surveys and certification on behalf of flag administrations
- CE certification for recreational crafts
- Management systems certification

Brief Classification & Certification process

- Technical review of plans and studies to verify compliance with applicable rules and regulations
- Surveys and tests carried out by LHR surveyors:
 - ✓ At the shipyard
 - ✓ At component construction facilities
 - ✓ At trials prior to delivery
- Issuance of certificates
- Periodical surveys to verify continuous conformity

For both newbuilding and fleet in service, LHR offers worldwide expertise and flexible and reliable services to demonstrate and maintain compliance at every stage of vessels lifecycle.

Credentials

LiberoHellenicRegister is an authorised RO to carry out statutory surveys and certification on behalf of various Flag Administrations.

Our statutory services are based on maritime international conventions and codes and the national requirements of each Flag Administration.

LHR also operates as an EU Notified Body and is accredited as per EN ISO/IEC 17065 as a Certification Body for the certification of personal watercrafts and small crafts up to 24 metres, their components and engines.

Our background

LiberoHellenicRegister, member of Libero Group which is an engineering, technical, product & management systems certification body and training centre, operates internationally.

Our team of surveyors consists of skilled and well-experienced professionals who will verify your vessel's compliance from preliminary design stage to final launching and during operation.

We believe that for every business, compliance is the key factor to gain competitive advantage, enhance customer satisfaction and optimise the effectiveness of its products and services.
